DISCLAIMER

3

It is the sole intent and agenda of WynnWirks to create a disruption free service and product to be used for all Industries, to help promote and build the welfare for all classes and groups of business. If you choose to Invest in the WynnWirks project, please make sure you do so with advice from a professional accredited entity. Investing can be risky business in any area or market. Please invest wisely.

WYNNWIRKS

Easily explained

Whatever You Need Now - NetWorks

WYNN-WIRKS

Pronounced: "WIN WORKS"

To bring WynnWirks into production, We had to decide where the best place to start would be. Truth is without Government adoption WynnWirks would be just another player/competitor in the scope of online commerce. We wanted it to do more than just compete, We wanted it to be a win for every User/Customer/Government. WynnWirks was redesigned with one goal in mind, to pay off the deficit of any country, to provide a platform for anyone in the world to be able to compete professionally in the area of marketing and trade. With that agenda in mind we went to work.

ABSTRACT

5

Definition: existing in thought or as an idea but not having a physical or concrete existence.

WynnWirks was designed back in the summer 2011. The whole purpose of WynnWirks was to help stabilize any economy by presenting a new platform for local or global trade in any industry for any Business structure. In a partnership-type sense, WynnWirks seeks to bridge the gap between local business and Government on any level, to help increase sales, revenue, and broaden the road for marketing. Over time WynnWirks realized it was building a hub that could bring all Blockchain technology together into one ecosystem. Or more easily put WynnWirks is designed to be a custodian in multiple areas.

The WynnWirks Project redesigned itself to bring a decentralized platform to coexist with a centralized platform. WynnWirks is designed to bring the fiat currency world and the Bitcoin peer-to-peer payment systems into one, by bridging the gap between Monetary policy with Government and the decentralized system of BlockChain technology. This allows Government and Banking systems to work with the Cryptocurrency platforms.

WynnWirks was designed to give everyone in the World of E-Commerce an edge for online sales, as well as bring a whole new store front for the Internet sales Industry, while providing clearer transparency for goods and services sold online. WynnWirks brings a whole new game changing platform to incentivize Business owners and Affiliate-like programs, to help increase any sales platform on any level, whether that be Municipal, Provincial or Federal.

WynnWirks was designed to help the Securities Commissions and Regulators with infrastructure by providing a clear transparent route for adopting cryptocurrency and blockchain type investments into the already pre existing structure of Investment vehicles.

WynnWirks will work on all levels Municipal, Provincial, Federal and Global.

WHY WYNNWIRKS IS NEEDED

6

As the World of Bitcoin and Blockchain technology advances so do the areas of

- **Money Laundering**

More and more opportunities for Money Laundering and Terrorist financing are developing. Now, more than ever, its easier for illegal operations to funnel millions and billions of dollars into any currency around the world. As more and more investors are looking for profits, they are pulling their money from traditional banking systems and investing in Crypto Currency markets without guidance or structure.

- **Safety & Security**

As more Blockchain developers build ground breaking platforms and disrupt industries, their business and their lives in some cases have been threatened. We have seen this with people like Andreas M. Antonopoulos who has needed to hire personal security as his life has been threatened.

- **Corporate Growth**

Large Corporations are starting to pull their capital from banking institutions and are moving towards a decentralized platform for larger profits and gains. This exposes them to greater risk without Government stability behind them to counter future risks and financial threats.

- **Government Growth**

Government is seeing a large upswing in unreported portfolio growth in the area of Cryptocurrencies. As Crypto keeps growing, Government is losing out on opportunities to profit within the Crypto industry.

WHY WYNNWIRKS IS NEEDED CONT-

7

- **Trade Wars & Agreements**

With the ability to trade with other customers outside of old trade agreements for higher profits, countries are turning to Bitcoin and Private Cryptocurrencies. (*“Not saying new trade isn’t bad”*) With more and more Decentralized platforms on the horizon, Governments & Security Firms will be chasing new forms of “Silk Road” websites for years to come. Trade wars not only encourage new forms of Crypto and Decentralization, but also encourage new trade agreements and different 21st-Century-type approaches to solving these problems. In return more Capital is being lost.

- **Financial War**

After President Richard Nixon cut the Gold Standard in 1971, Fiat currency has lost its intrinsic value. Literally, value for Trade became whatever someone believe their to be value in. In the words of Real Estate, “Fair Market Value, is what a reasonable buyer and a reasonable seller are willing to accept”

If the cat was let out of the bag back in 2011 on the fundamentals of Money, Currency and what can store value, here we are 2018 and Bitcoin and Blockchain have a market value of over \$300 Billion with a previous high of \$800 Billion in Dec 2017. Traditional systems are so far behind now it literally looks like an act of war to try and slow it down.

As the old saying goes, “If you can’t beat-em, join-em”.

Bitcoin and Blockchain is a scenario where the pros out weigh the cons if we could start running along side of this industry instead of against it.

The question has long been served, *“What do you think will happen when 300Billion gets blocked from public access and markets start dropping?”* I’m pretty sure people, corporations and governments/kingdoms have started wars for a lot less.

Approaching a new idea of working with Cryptocurrencies has now become a race for time.

WHY WYNNWIRKS IS NEEDED CONT-

8

• **Current Problem & Solution For Government**

Currently there is \$300 Billion in the Cryptocurrency Market. There is roughly over #200 Billion in different Currency coins to help establish public and private payment systems. There is roughly over \$100 Billion devoted towards database infrastructures that could excel in so many different areas in the world of technology.

When this type of money is forced to sit too long Government will start seeing activists, whether personal, corporate or conglomerate giants stepping across ethical lines to push their agenda's.

If there has ever been any lesson in life that history has taught us, it is that people will cross lines for a chance at fortune, especially when that fortune could be in the billions- and non taxable.

On a general consensus, it was measured and found that most people don't mind paying taxes if it helps their towns, provinces, state or Government. However, as time goes on and people see less help and a down-sliding economy, more and more people will start looking out for them selves, seeking new opportunities to make a dollar and pay less tax. *After all, I have never met anyone who said they liked "being broke" and wouldn't want to make some extra money.*

As time goes on without solutions in place, more and more Bitcoin and Blockchain will look disruptive to traditional systems and finance.

WynnWirks decided to build the ultimate solution, with a large proportion of its revenue going straight back to the federal budget. What if we could use Bitcoin and Blockchain to help pay off our deficit and turn the economy back on. WynnWirks has found a way!

WynnWirks is holding to its motto "We have the solutions and the Blueprint to make it work".

CUSTOMER SERVICE

Unless you own the monopoly in a specific area, (which still should not be an excuse), how do you provide *Excellent, Quality, Outstanding Customer Service*?

Customer Service was where we started. How do you provide the best possible solution and Customer Service in any area or any Industry? Well, you need to start by providing everyone with the same tools. In today's tech age, there're multiple ways to do your accounting, emailing, selling, or updating your contacts, like which CRM (Client Relationship Management) software to use. The internet is riddled with thousands of options for Companies and Sole Proprietors to jump in and take their business to new levels. Most of us wait for word of mouth, or until we hear it from a friend, before we decide to trust any website or software program with our valuable information. Once we take that leap of faith the Journey begins.

Truth is, without spending large amounts of money on advertising, training and the best website, how else would you get your business model in front of searching customers? Instantly (at this point) you have come full circle from where you started. And now looking at yourself in the mirror, your back trying to accomplish what you were almost too afraid to start with in the first place.

The System of taking any business and putting it online is a tough process, start through finish. So we decided to take the hard parts out and leave the making money part to you. After all what are friends for?

WynnWirks decided to build the ultimate platform, with true transparency for it users and clients. We wanted to provide trust and ownership, we wanted to bring honesty and build a relationships that could be relied upon for years to come. We wanted to provide safety and security for all users, including private and public access.

WynnWirks wanted to provide the Customer Service you needed before you even had to ask or before you knew you needed it.

So we went to the future to find it for you! If we haven't made you smile yet then we hope you'll keep reading.

PLATFORMS PROVIDED

10

The following platforms and framework for areas covered include but are not limited to:

Infrastructure for:

- Civilian / Personal
- Business / Corporate
- Rural / Municipal / Provincial
- Federal / Government / Global

Industry framework:

- Education / Scholarships / Grants
- Agriculture / Lumber / Commodities
- Oil & Gas / Petroleum
- Commerce / E-Commerce / Retail / Business Development
- Finance / Insurance / Banking / Lending / Health Care / Wills & Estates
- Real Estate / Corporate / Commercial
- Oceans & Fisheries / Wildlife / Hunting & Trapping / Framework
- Legal / Notaries / Groups / Boards / Organizations

PLATFORMS PROVIDED

11

Building & Growth:

- Funding, Crowdsourcing, Charity and Funding Solutions
- Project Planning & Implementation, CRM Infrastructure
- Freight & Shipping Framework, Vendors, Shippers and Suppliers
- Inventory & Product Management Framework
- Income producing asset infrastructure
- Municipal, Provincial and Federal Budget Framework
- Deficit payoff infrastructure, Taxing guidelines Framework
- Welfare, Income Assistance and EI Framework,
- Community Building Framework
- Voting Structure and Confidence
- Carbon tax & Greenhouse gas emission solutions
- Providing Stability for Ethics and Access to Information and Privacy
- Real Estate, Conveyancing, Statistics,
- Legal for Personal and Corporate
- Smart Contracts
- Advertising, Sales & E-commerce
- Medical Industry, CDC Solutions & Healthcare and resources
- Environmental impacts and restoration procedures

PLATFORMS PROVIDED CONT-

12

Building & Growth:

- Internet Security infrastructure for Children and Teens
- Governance / Regulatory Guidelines / Compliance Issues
- Security Measures for Client and Customer Data Protection including KYC
- Data Storage / Online Resources / Cloud Resources
- Entrepreneurship
- Blockchain Development
- Anti Disruption Framework
- Job Creation
- Adoptable Framework for Trade & Marketing

These are just a few scenarios in the way WynnWirks can help.

WynnWirks is constantly being revised to suit multiple needs and structures.

SUMMARY

13

The WynnWirks Project was designed to fix real problems in real time.

To adapt to other Blockchain projects already in use.

To provide a home to other Blockchains in need.

We would love to tell you exactly how but thats kind of like giving away a priceless recipe.

This is just a taste of what we can build.

Our first Step will be as follows:

Approaching Government

Canada & United States of America. (North America)

WynnWirks is actively seeking an audience with the Governor General and the House of Commons to present a plan of what is needed and why Government will want a closer look at the WynnWirks Project.

WynnWirks believes as Bitcoin and Blockchain mature, the need for WynnWirks will increase as will its need for the safety and security of its users of the Industry.

BLUEPRINT & SCHEMATICS

14

CONFIDENTIAL

For safety and security reasons we have kept the Blueprint and prototype offline.

Please do not attempt to hack us as you will not find anything.

Blueprint will be made available only after an audience and consequent deal with Government has been made.

Thank you
